Tony,

Here's the link to the presentations we saw in El Paso.

www.epwu.org/desal_presentations.html

Also, I'd like to pass an idea by you.

We all concluded that it would be beneficial if at the next conference someone gave a presentation on UIC 101. Specifically, to point out the significance of injecting above or below the USDW and the ramifications of both. This presentation could be from the state's perspective, the Region's perspective or the national perspective. I think we are all willing to do it. We could offer EPWU the option of choosing the perspective.

Before any offer is made to EPWU, what do you think?
